

## CFEOR Endorsed Projects

1. Spatial Nutrient Loading in the Newnans Lake Watershed
2. Multi-scale Modeling of Fire Dynamics to Assess Longleaf Pine Regeneration Success.
3. Management Options for Hardwood Forests of Florida: Sustaining Timber production, Biodiversity and Wildlife Habitat
4. Ecological Consequences and Impacts of Invasive Plants on southern forest ecosystems (ECIIP): A regionwide research and educational partnership
5. Developing an adaptive multifunctional uneven-aged management system for the longleaf pine sandhills and flatwoods of the southern U.S. Coastal Plain
6. Changing face of southern forests: Interactive effect of climate change, land conversions and invasive plants?
7. Fire in the Juniper Prairie Wilderness Area: Is it a viable tool for ecosystem management?
8. Ocala National Forest Off-Highway Vehicle Visitor Assessment
9. Evaluation of Natural Resistance to Laurel Wilt Disease in Red Bay (*Persea borbonia*)
10. Increasing awareness and knowledge about using woody biomass for energy production
11. Conversion of Even-aged Slash Pine Plantations to Uneven-aged Slash Pine Stands: Implications for timber production, ecology, and fire risk.
12. Use of low-volume, backpack directed sprays of glyphosate, metsulfuron, and imazapyr herbicides for selective control of Japanese climbing fern (*Lygodium japonicum*) in Florida's natural areas
13. Planning, Research, and Design of New OHV Recreation Areas
14. Understanding the Human Dimensions of OHV Recreation on the Ocala National Forest to Aid in Management and Planning
15. Florida National Scenic Trail User Assessment and Marketing Study
16. Visitors' Preferences and Economic Impact Assessment of OHV Recreation in Florida
17. Response of bat communities to prescribed fire in pine forests of Florida
18. Scrub Jay Responses to Wildfire in the Juniper Prairie Wilderness
19. Reducing carbon cycle uncertainties in pine forests in the southeastern U.S.
20. Carbon sequestration scoping project analysis
21. Recovery and Regeneration of Forested Wetlands Following Timber Harvest: Evaluation of Best Management Practices in Florida
22. Understanding the effects of nutrient limitation on ecosystem processes in longleaf pine savannas
